# Предисловие

Данное пособие направлено на подготовку учащихся к сдаче итоговой аттестации по контролю чтения за курс английского языка начальной школы. Оно состоит из 10 вариантов тестов с текстами и 15 заданиями к ним.

По окончании 4 класса школьники должны уметь понимать основное содержание относительно несложных текстов и находить в тексте интересующую информацию. Проверяемые навыки и умения: чтение связного текста и поиск в нем требующейся информации и ответов на поставленные вопросы; составление личного письма с опорой на образец.

Предлагаемые варианты дают возможность определить достигнутый учащимися уровень, получить необходимую информацию о степени готовности выпускников начальной школы к сдаче итоговой аттестации с учётом требований образовательного стандарта и заблаговременно выявить недостаточно усвоенные материалы для их последующего восполнения.

Работа с данными тестами может проводиться на уроках или дома и оцениваться учителем или родителями.

### **Best friends**

Ann and Nick live on the same street and go to the same school. More than that, they sit together at the same desk. Ann and Nick are never late for school because they are attentive to their duties. During the breaks Jack plays football in the yard with other boys. Ann plays hopscotch with the girls. Nick collects stamps and he always shows new stamps to Ann. Ann likes Nick's hobby.

As for Ann, her hobby is gathering and drying wild flowers. She has a special place to keep them in. It is called herbarium. The best time for gathering wild flowers is summer, of course. So when summer is over, all her flowers are dried, Ann shows them all to Nick. Nick likes to look at them and to learn their names.

When Nick is in the swimming-pool, Ann takes her ballet lessons. When Ann is on the tennis court, Nick is in the chess studio. He wants to become a chess champion. They like to do their home task together.

## ***Задания***

Dear friend,

As for me I like to go to school on Fridays. We have Drama and Computer classes on Friday. These are my favourite subjects after P.E. and Maths. I have got many friends here in Britain and a lot of pen friends in Moscow. I often sit at my desk and write letters to them.

I like to read books but the most part of my time I spend with my computer. But it's not only games that I like. I also learn to use different programs.

My father is a scientist. He works in the institute. He is often away because of his job. My mother is a pianist. She composes beautiful pieces of music. I want to design cars with the help of computer, of course.

Write soon, Tom

## **Everything is good in its season**

For different weather people have different clothes. So you cannot see a person wearing a warm coat and a warm hat on a hot sunny day. And you can't walk in shorts and sandals when it snows.

Of course, there are places where winter lasts all year round. We speak here about places where winter is winter and summer is summer. In cold weather people usually wear warm clothes such as sweaters and jackets, thick trousers and overcoats. In winter they put on warm coats, warm hats, a pair of boots and scarves. To get hands warm they wear mittens or gloves.

When summer comes everything changes. Everyone can wear light T-shirts and shorts or a dress and sandals.

There are two things to remember about clothes: keep them clean and tidy and prepare them before the season comes.

## Healthy food

Food plays a very important role in our life. A lot of people don't think of what they eat. They buy snacks, hamburgers, hot-dogs and other fast-food products. They drink cola all day long instead of tea, juice or water. But if you want to be healthy, you should choose right food, the food that is good for you. The healthier food you eat the better you feel. The right food gives our body physical strength and health. It helps you get good marks at school.

Fat food is very bad for us. Sweets are bad for our teeth. Lean meat, fish, porridge, fresh fruit and vegetables give us energy and contain a lot of vitamins.

So if you want to be healthy, you must follow some rules: choose water as a drink; eat more fruit and vegetables; have your breakfast, lunch, dinner and supper in time. And don't forget that we eat to live but not live to eat.

Hello!

My name is Alex. Last summer we lived in a small house in the country. There were three rooms, a kitchen and a bathroom in it. There were many fruit trees behind the house and many flowers in front of it.

Our flat is in the central part of Troon. It is not very large but comfortable. There is a bed, a desk, a bookcase and two chairs in my room. I've got a lot of interesting books in my bookcase. I like to sit at the desk and to read. On the floor of my room there is a nice blue carpet.

### Birds

June is the first of the summer months. It is the time when we have most daylight. In June birds build nests for their children, so they are very busy. Birds use soft grass and small branches to build a nest. So the future parents fly up and down to bring blades of grass or small branches from the ground. Then the female bird lays eggs. Usually there are two or more eggs in the nest. The mother bird sits on the eggs keeping them warm. Then the kids appear. At first they look awful because their bodies are too small and their beaks are too big. They don't have feathers. Their parents spend all day long catching insects to feed the kids.

The young birds are sometimes in danger until they can fly. Their parents defend them and act bravely if danger is near. Some weeks later the young birds' feathers are big enough and they learn to fly. They learn to fly to discover the new world around them. Later they all will have their own families, grow their own kids and watch them fly away.

### **Our yard team**

Usually children like summer most of all. It is not the same with our yard team. We like to come home after our summer holidays and tell each other stories about how we spent summer. We are a team of nine members: six boys and three girls. So on the 1<sup>st</sup> of September we meet on the yard playground and discuss our plans about sport competitions for this year. Our team has a special uniform: a blue T-shirt and red shorts. We use this uniform when we play football, volley-ball or basketball. For winter competitions, such as hockey, we have a warmer uniform.

Andrew is our captain. Helen is our doctor because she knows a lot about first medical help. Everybody is very important in our team. Usually we play football at the stadium which is not far from our school. To take part in hockey matches we go to the skating-rink. Before the match we train a lot. We also keep on a special diet which means only healthy food. On Sundays we go to the library where the librarian gives us old magazines with articles and stories about great Russian sportsmen. There is an important condition for each member of our yard team – to have only good marks at school. We have a photo album with a lot of pictures from our competitions.

## **In the forest**

It was Friday evening. October was very warm and not very rainy. So father suggested spending this week-end in the forest. Everybody was happy. Julia took her pen ready to write down what things and what food to buy.

“Tom, what are you doing tomorrow morning? Would you, please, go and buy some meat and vegetables?” asked mother.

So it was decided that Tom would go and buy everything to eat for the hike. Father went to the garage to examine our tent. In the morning when everything was ready we took the bus and got to the place thirty minutes later. The forest was beautiful, full of red, green, yellow and brown leaves. The sun was high and it was rather warm. But not warm enough to be in T-shirts. So everybody wore sweaters. The tent was put up and the luggage was unpacked. Then it was time to have some sandwiches with tea. After that Julia went to pick mushrooms with father and Tom went to gather berries not very far. Mother stayed in the camp to look after the fire. It was fun to spend the day together in the forest. Thank you, October!

### **Paul's flat**

Paul lives in a nice flat in a new block of flats on the seventh floor. There is a lift, but Paul likes to walk upstairs and downstairs. Sometimes he takes his bicycle with him. So his way up or down takes a little bit longer. But, of course, his parents and his grandmother use lift each time.

There are four rooms, a kitchen and a bathroom. The living-room is the largest one. It has a wide window and a balcony. In the middle of the room there is a big table with six chairs around it. Also there is a bookcase and two armchairs near it. In the evenings Paul's parents sit in the armchairs and read books or discuss something interesting.

The bedroom is smaller than the living-room. There are two beds and a wardrobe in it. Also there is a big mirror to the right from the door.

Paul's room is the smallest. He sleeps and does his lessons there. Paul likes his room most of all.

Dear friend,

My name is John. I am eleven years old. I live not far from Oxford with my parents and a four-year-old brother James. He likes to play different games and to go for a walk. He doesn't speak well, but he is cute. I often stay with him when mother and father go to the theatre or somewhere else. On Saturdays my friends David and Kate come to see me. We play together with James. He is very happy at these moments. After that we do our home-task together.

What is your name? Do you live in a city or a village? How old are you? Do you have sisters or brothers? What do you usually do with your friends after school?

Yours,

John

### Kitty's day

Today is Tuesday. Kitty gets up a little bit earlier on Tuesdays because it is her swimming day. She goes to the swimming-pool twice a week. So she gets up earlier to have enough time to get ready for school. First of all she makes her morning exercises and goes to the bathroom to get a shower and clean her teeth. After breakfast Kitty packs her schoolbag and irons her school uniform. Kitty's grandmother brings her lunch because Kitty has twenty minutes of free time after the swimming-pool.

School begins at a quarter past twelve. The first lesson is Maths. Kitty likes Maths and gets only good marks. Handicraft is her favourite lesson. During this lesson girls learn how to cook and to sew. Today the topic of the lesson is drawing a dress.

After school Kitty goes home and takes her dog Ralf for a walk. Ralf likes Kitty and Kitty likes Ralf. In the evening she does her lessons for Wednesday. At 7 p.m. she has supper. After supper Kitty goes to the living-room and draws a vase with flowers for her Drawing lesson. At 10 p.m. she says "good night" to her parents and goes to bed.

Dear friend,

My name is Susan. I'm ten years old. I live in Ottawa with my granny and my father. I would like to tell you about my school. It is not very big, but very beautiful. We have twenty classrooms and a gym.

My classroom is comfortable and it is always light and clean. There are sixteen desks in it. The teacher's table is near the window. The blackboard is green. Near the blackboard there is a big bookcase. We often read books in class together. I like fairy tales most of all.

Write soon,

Susan

## **The Sun, the Earth, the Moon**

We live on the Earth. It is round. It is full of wonders. The Sun lights up the Earth. The Sun is really a star. The Earth turns around each day. The half of the Earth which meets the Sun is light. It is day-time on this half. The other half is dark. It is night on that half. The Sun is a million times bigger than the Earth. It's much closer to the Earth than other stars. It gives us light and heat. So it gives us life. Plants and animals cannot live without the Sun either.

The Moon is our nearest neighbour in space. The Moon is smaller than the Earth and it moves around it. It takes spaceships three days to fly to the Moon. People use telescopes to study the Moon, the stars and the planets.

Our planet is full of wonders. There is a lot of water on the Earth. There are a lot of fields and mountains. It is a real pleasure to look at the sunrise in the early morning or at the sunset in the evening. We must do our best to keep our planet clean.

## **What's the time?**

People always want to know the time – the time to get up, the time to go to school or to work, the time to eat and the time to go to bed. People often plan their day, so they fix time for different activities. It is very important to know the time when you go to pass an exam or you go to the theatre or cinema. That is why everybody has clocks at home and watches in the pocket or on one's hand.

A clock has a face and two hands: a short hand and a long hand. The short hand is for hours. It is the hour hand. The long hand is for minutes. It is the minute hand. Sometimes clocks have a very thin hand for seconds. The clocks are usually big and we can see them on the wall, on the table or on the shelf.

Watches are small. They are usually made from metal or plastic. Watches have three hands and they also show hours, minutes and seconds.

So clocks and watches show the time. Everybody knows that day and night has 24 hours, an hour has 60 minutes and a minute has 60 seconds. You can count and say how many seconds there are in an hour. Time flies, so try to use it for good goals.

Dear friend,

My name is Kate Larson. I live in Liverpool, England. I go to the elementary school and I really like it. Usually school starts at 8.30. Every day we have different lessons according to the timetable. When we meet in the classroom we start the day with a song or a game. At 10.30 we have a break during which most of the students go outside. I like to discuss my school work with my teacher Miss Howard. At 11.20 we have lunch at our school canteen. After lunch we usually have Drama classes, P.E. or Art. At 3 o'clock I go home and help my mother about the house. We cook dinner together. After dinner I do my homework, read or watch something interesting on TV. I go to bed at 10 o'clock.

Best wishes,

Kate
